Summary

With 15 years of experience in the design industry, including nearly 10 years specializing in UI/UX design, I am dedicated to creating not only visually appealing but also user-friendly websites and applications, while maintaining their design systems. I thrive on challenges and continuously seek opportunities for professional growth and learning. Additionally, I'm passionate about print and have worked as an Art Director for both Cosmopolitan and InStyle magazines.

Experience

Senior UI Designer at Docler Holding - June 2023 - Present

I was promoted to work on the newest acquisition of Docler and redesigned one of the world's most valuable adult web domain's layout with strong mobile focus. I also created the brand book and design system. As part of my daily work I conducted extensive research to understand user needs. Additionally, I revamped the site's internal platform to improve the experience for content creators where they can manage their contents. As a senior, I also mentored new team members.

UI Designer at Docler Holding - Jan 2021 - June 2023

I designed Docler's websites, focusing on Livejasmin.com, which has more than 50 million users daily and is a market leader in the livestreaming industry. My daily responsibilities included creating new features, redesigning existing components, and producing campaigns.

Art Director at Cosmopolitan magazine - Aug 2022 - Aug 2024

In 2021, the print edition of Hungarian Cosmopolitan was relaunched. As Art Director, I was responsible for designing layouts and collaborating closely with the Editor-in-Chief and Graphic Designer. The magazine ceased publication in August 2024 due to the publisher closing its operations.

Art Director at InStyle magazine - Jan 2020 - Jan 2021

As Art Director, I contributed to the magazine's layouts while also generating ideas for editorials and participating in photoshoots. My work included designing Hungarian covers, cover stories, fashion editorials, and various creative shoots. Managed design across print and digital platforms, including instyle.hu and social media channels.

Digital Art Director at Marquard Media - Feb 2019 - Jan 2021

As Digital Art Director, I designed mobile applications such as ShoppieGo, which reached over 100.000 users. I created interfaces for new products, including #vegyelhazait, which grew from a small Facebook group into one that has over 450.000 members. I created website designs e.g. joy.hu, instyle.hu and others. Additionally, I was responsible for the company's brand identity and led its redesign.

Senior UX/UI Designer at Marquard Media - Nov 2017 - Feb 2019

As a Senior UX/UI Designer, I was responsible for Marquard Media's Hungarian websites, such as playboy.hu, family.hu, marquardmedia.hu, as well as Polish sites including esquire.pl, papilot.pl, and kozaczek.pl. I also provided UX and UI feedback to the Polish design team.

UI Designer at Marquard Media - Feb 2016 - Nov 2017

As a UI designer, I redesigned and maintained Marquard's websites, ensuring they kept a modern and trendy look. I also created banners, social media campaigns, and multimedia content.

Designer at InStyle magazine - Sept 2010 - Feb 2016

I collaborated with editors to design magazine layouts, sent them to the photo production studio, and forwarded them for approval. Once finalized, the pages were sent to the printing house.
